

SWIM-INFR-06b — Ground side SWIM technical infrastructure for Air-Ground Advisory Information Sharing

Addresses the need for enabling a secure and reliable integration of the aircraft into the SWIM network on the ground side of the Air-Ground SWIM. It covers ground side functions that allow SWIM Enabled Aircraft applications to interact with SWIM Enabled Ground applications via provisioning and consumption of SWIM Services. The current scope covers the Advisory Purple Profile Enabled SWIM Services (uplink and downlink) related to the sharing of supplemental information that is not necessary for and not directly interfering with the command and control of an aircraft.
