

AUO-0109 — UDPP for Airport constraints

The OI Step will address the prioritisation of an AU's group of flights involved into one airport constraint on Departure or Arrival. It shall address as well the integration of the prioritisation into the reconciliation process in case of multiple constraints.

Rationale AUs driven prioritisation process (UDPP) running during planning phase, allowing prioritisation coming

from AUs to decrease the impact on their fleet in case of an Airport constraint (e.g. runway saturation). Airports in collaboration with the AUs involved have to come up with a solution to manage the Airport

constraint taking into account the network situation if impacted.

Forecast V3 end date 31-12-2021

Benefits start date (IOC) 31-12-2027
