

CNS-0003-A — Rationalisation of SUR functionalities and/or technologies for CNS systems supporting cost efficiency, spectrum efficiency, etc.

Rationalisation of SUR functionalities and/or technologies for CNS systems supporting cost efficiency and spectrum efficiency.

The aim of the rationalisation of the SUR functionalities and technologies is to produce more efficient systems i.e. in terms of RF use and cost savings. When sharing components from different systems, contingency procedures in case of failure should be studied and implemented.
