

# Solution PJ.05-03 — Remote Tower Centre with Flexible Allocation of Aerodromes to Multiple Remote Tower Modules

Remotely Provided Air Traffic Services from a Remote Tower Centre with a flexible allocation of aerodromes to Remote Tower Modules will enable the provision of remote tower services to a large number of airports with a flexible and dynamic allocation of airports connected to different RTM over time. It includes the development of RTC supervisor and support systems and advanced automation functions for a more cost efficient solution, integration of approach for airports connected to the remote centre and connections between RTCs with systems for flow management between remotely connected airports and development of tools and features for a flexible planning of all aerodromes connected to remote tower services.

**Program** SESAR 2020 Wave 1

**Need for coordination** Local
