

# Solution PJ.07-03 — Mission Trajectory Driven Processes

Mission Trajectory Driven Processes refer, through a full integration of the WOC within the ATM system, to the updating of wing operations centre (WOC) processes for the management of the shared and reference mission trajectory (SMT/RMT). These processes respond to the need to accommodate individual military airspace user needs and priorities without compromising optimum ATM system outcome and the performances of all stakeholders.

**Program** SESAR 2020 Wave 1

**Need for coordination** Network
