

Solution PJ.17-01 — SWIM TI Purple Profile for Air/Ground Advisory Information Sharing

¿SWIM-TI Purple Profile for Air/Ground Advisory Information Sharing¿ consists of open standards based, reliable and secure SWIM technical infrastructure enabling the integration of the aircraft into the SWIM network, thus giving it access to air/ground SWIM services (e.g. uplink and downlink of meteorological and aeronautical information).

The solution supports ATM operational improvements that depend on Air/Ground (A/G) information exchanges to enable a better situational awareness and collaborative decision making, with a focus on advisory information (¿supplemental information that is not necessary for and not directly interfering with the command and control of an aircraft¿).
