

Solution PJ.03b-01 — Enhanced Airport Safety Nets for Controllers

Enhanced Airport Safety Nets for Controllers: Safety alerts for controllers detect potential and actual conflicting situations, incursions and non-conformance to procedures or ATC clearances, involving mobiles (and stationary traffic) on runways, taxiways and in the apron/stand/gate area as well as unauthorised/unidentified traffic. Controllers are provided in all cases with the appropriate alerts.

Program SESAR 2020 Wave 1

Need for coordination Local/Network
