Completion Rate Evolution (Number of Airports completed the objective)

### Main 2018 developments:

Implementation progress has increased compared to 2017, with a total number of 43 airports having completed this Objective by end of 2018. Six airports reported for 2018 that the implementation is still ongoing and one (1%) has planned the implementation by end of 2020. Three airports reported having not yet planned the implementation of this Objective. The issues that cause delay in implementation seem to be related to the establishment of Partnership Agreements among Stakeholders as well as Airport Policies and Procedures still to be developed related to pollution mitigation.
