

ENV02 — Airport Collaborative Environmental Management

[Download Progress Report](#)

Implement or identify existing formal working partnership arrangements between ANSP, Airport and Aircraft Operators at individual airports to address and assess the environmental challenges at and around the vicinity of the airport. These challenges can be a significant constraining factor to efficient and sustainable operations.

- Topics include but are not limited to:
- minimising noise and atmospheric emissions in particular CO2 and NOx (including fuel burn);
 - introduction of new operational changes such as airspace design to include new entrants such as UAM, Hybrid and or hydrogen aircraft, different approach or departure procedures including CDO/CCO and PBN implementation, new airport infrastructure
 - Compliance with airport-related legislation and environmental certification requirements
 - Management of aircraft and airfield de-icing resulting from combined aircraft operations at the terminal airspace and ground.
 - Adaptation to Climate Change (risk to infrastructure, de-icing strategies, water);
 - Facilitate implementation and uptake of Sustainable Aviation Fuels;
 - Contribute to robust community engagement dialogue and relations with local authorities.

CEM working arrangements will enable a greater understanding and awareness of interdependencies and facilitate jointly agreed solutions for sustainable environmental operational performance improvements that can benefit joint operations as well as local community engagement and relationships with local authorities.

NOTE FOR MILITARY AUTHORITIES: It is the responsibility of each military authority to review this Objective IN ITS ENTIRETY and address each of the SLoAs that the military authority considers RELEVANT for itself. This has to be done on top and above of the review of "MIL" SLoAs which identify actions EXCLUSIVE to military authorities.

NOTE: A CEM Online tool is available at the link below with the purpose of providing a common platform to assist key operational stakeholders at airports in setting up a CEM Working Arrangement and to demonstrate compliance with the CEM Specification's Requirements:

Deployment Programme 2022

-

Operating Environments

Airport

Expected Performance Benefits

Safety	-
Capacity	Airports may see a gain in capacity if noise restrictions are lowered
Operational efficiency	Reduction of noise, fuel burn and CO2. Contributing to cost and Noise/CO2 savings for airlines and airports. Airports may see a gain in capacity if noise restrictions are lowered.
Cost efficiency	-
Environment	Reduction of fuel use, noise, emissions and de-icing water pollution resulting from a structured collaborative approach that jointly identifies effective sustainable operational solutions for implementation and monitoring.
Security	-

Stakeholder Lines of Action

Code	Title	From	By	Related Enablers
ASP01	Initiate and participate actively in formal collaborative working arrangements with the Airport and Aircraft Operators. Deliverable to identify and prioritise joint actions to minimise environmental impacts of air traffic procedures in and around the airport			EN
ASP02	Train and raise awareness of controllers on the environmental impacts of aircraft operations and ways to improve performance			
APO01	Initiate and participate actively in formal CEM working partnership arrangements with the ANSP and Aircraft Operators to minimise the environmental impact of air traffic procedures in and around the airport			EN
APO02	Ensure appropriate and relevant performance data availability at Airports			EN
APO03	Ensure appropriate Airport policy and procedures and, if required, relevant infrastructures needed to manage and mitigate pollution due to de-icing activities			EN
APO04	Train and raise awareness of controllers on the environmental impacts of aircraft operations and ways to improve performance			
USE01	Initiate and participate actively in formal working partnership arrangements with the ANSP and Airport to manage and minimise environmental impacts of air traffic procedures in and around the airport			EN
AGY01	Provide assistance and guidelines to assist airports in setting up formal partnership arrangements between ATSP, Airport and Aircraft Operators for achieving control of environmental impact mitigation	FINALISED
