

Deployment Scenario Title	Traffic alerts for pilots for airport operations
Deployment Scenario Description	Traffic alerts for pilots for airport operations: this refers to enhancing on-board systems for the detection of potential and actual risk of collisions with other traffic during runway and taxiway operations. In all cases, the flight crew will be provided with appropriate alerts.
Essential Operational Change	Airport and TMA performance
Maturity	In development phase: Key Solutions Approaching Maturity

Applicable Operating Environment			
Airport	Terminal Airspace	En-Route	Network
